

Health Career Exploration Program

Open the door to a healthcare career for your students!

We offer an introductory 1.5-hour program to introduce high school students in 9th-12th grades to careers in healthcare.

Students will:

- Learn about the vast variety of opportunities in the healthcare field, including nontraditional careers
- Identify area colleges and training programs offering higher education in healthcare fields
- Set up an account on CareerZone, and complete a self-assessment

Help your students learn about the different careers in healthcare as well as their strengths, skills, talents and interests!

To learn how to bring this program to your students, contact Adrienne Cross, Program Coordinator, at across@hmahec.org or 518.480.2432.
